

VOLUME 1:
CLIMATE CHANGE ISN'T A TRAGEDY, IT'S A CRIME.

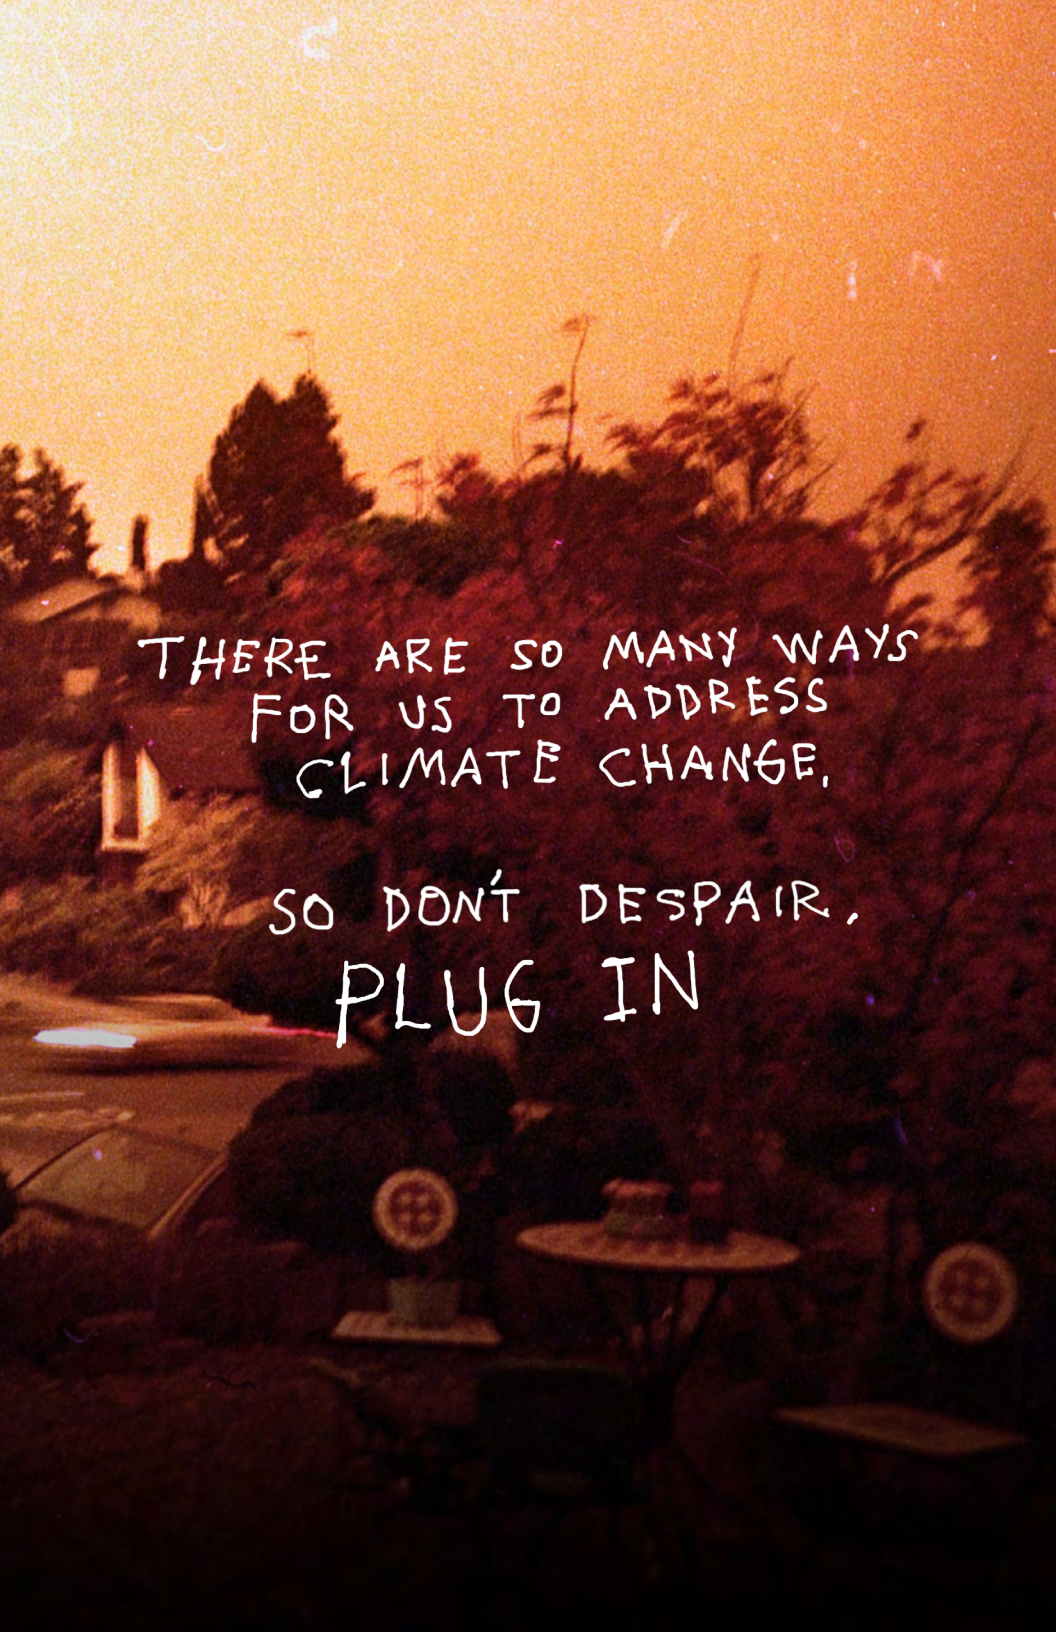

VOLUME 1:
CLIMATE CHANGE ISN'T A TRAGEDY, IT'S A CRIME.

The background of the entire image is a photograph of a sunset or sunrise. The sky is a deep orange and yellow, with some darker clouds. In the foreground, there's a dark silhouette of a boat on the left. In the middle ground, there are dark silhouettes of trees and what appears to be a shoreline. The overall mood is somber and urgent, reflecting the theme of the text.

CAN WE MAKE
POLLUTERS PAY FOR
CLIMATE CHANGE?

IN SHORT? YES.

Our communities are paying the price for Big Oil's climate damages and deception. Our neighbors are losing their homes, and sometimes even their lives, to fires, floods, and extreme heat. Cities and states are spending billions to respond to nonstop climate disasters and extreme weather events. But instead of paying their fair share for the damage they've caused, fossil fuel companies continue to rake in massive profits at our expense.

THERE ARE SO MANY WAYS
FOR US TO ADDRESS
CLIMATE CHANGE,

SO DON'T DESPAIR,
PLUG IN

THEY KNEW. THEY LIED.

The fossil fuel industry has been taking climate science seriously when it comes to its own operations. Exxon, Mobil, and Shell began preparing for catastrophic storms and rising seas decades ago.

Since the 1950s, documents show, however, these companies implemented a plan to undermine and discredit climate science, executing years of propaganda and PR campaigns, and funding academia to spread disinformation and sow doubt.

What climate change is costing our communities

The consequence of Big Oil deception is worsening climate change that is driving extreme weather, but the bill for this devastation is paid by YOU. The U.S. experienced 23 separate weather and climate disasters in 2025 that caused at least \$1 billion in damages, marking the third-highest annual tally on record.

These events resulted in a total cost of approximately \$115 billion and 276 direct/indirect fatalities, with the LA wildfires being the most destructive event.

I WANT MY MONEY TO GO
TO PARKS, GARDENS, COMMUNITY
SAFETY, GREEN SPACES, PRAIRIES,
RIVERBEDS, FARMERS, SCHOOLS,
HOSPITALS, BIKE PATHS, RENEWABLE ENERGY,
THIRD SPACES, A LIVABLE FUTURE FOR
MY CHILDREN, A HABITABLE AND
HUMANE WORLD.

NOT THE FOSSIL FUEL INDUSTRY.

-EMILY MILLER

THE MOVEMENT TO MAKE POLLUTERS PAY

Make Polluters Pay is a campaign to hold fossil fuel companies accountable for the damage they're causing to our climate and communities. Modeled on the Truth Campaign that went after Big Tobacco, Make Polluters Pay is building a groundswell of public support behind legal and political efforts to hold the fossil fuel industry accountable for climate damages.

WHAT IF CLIMATE SUPERFUNDS

WOULD REQUIRE OIL COMPANIES
TO PAY FOR CLIMATE DAMAGES

Vermont and New York have already passed “climate superfund” bills that will make oil and gas companies pay for climate damages, and more than a dozen states are pursuing similar legislation.

WE CAN SUE.

46 states, cities, and municipalities are also suing fossil fuel companies for fraud and climate damages. Around the world, many countries and communities are pursuing similar strategies.

While the arguments and evidence are different across lawsuits, the reasoning is the same:

- ★ The industry *knew* their products would cause harm.
- ★ The industry *lied* and concealed that information from the public.

INSURANCE

- ★ SHIT GETS MORE EXPENSIVE AS EXTREME WEATHER AND CLIMATE CHANGE GET WORSE.
- ★ EXTREME SWINGS IN WEATHER CAUSE SHORTAGES AND MAKE ELECTRIC, HEAT, & WATER UTILITIES EXPENSIVE.
- ★ EXTREME HEAT HURTS CROPS AND LIVESTOCK, MAKING FOOD EXPENSIVE.
- ★ WHEN THERE'S NOT ENOUGH RAIN, THERE'S LESS WATER TO DRINK, WHICH FORCES COMPANIES TO RAISE PRICES.
- ★ INSURANCE POLICIES ARE GETTING HARDER AND MORE EXPENSIVE TOO — NO COMPANY WANTS TO INSURE RESIDENTS NOW THAT CLIMATE DISASTERS ARE MORE COMMON.

WHEN WE ORGANIZE,
WE CAN REWRITE THE
RULES AND BUILD
SOMETHING MORE HONEST,
AND MORE PREPARED
FOR THE FUTURE
WE DESERVE.

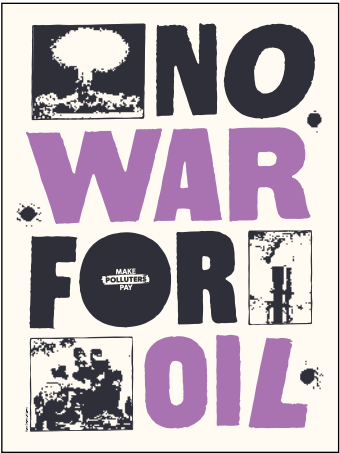

IMAGINE A WORLD WITHOUT FOSSIL FUELS

If oil stays at the center of global politics, there will always be another excuse, another emergency, another country offered up as collateral. Stopping oil profiteering and building clean energy aren't separate fights. They are the same one.
